FOR IMMEDIATE RELEASE

NEW TRAFFIC PATTERN FOR INTERSTATE 15 INTERCHANGE PROJECT IN VICTORVILLE

SAN BERNARDINO – The California Department of Transportation (Caltrans) and Ames Construction have established a new traffic pattern at 1600 'D' Street in Victorville within the construction area which is expected to be in place until the middle of July.

The new configuration allows for one lane in each direction, with traffic utilizing two of the four lane highway. The remaining two lanes will be completely blocked off for bridge pier construction. Traffic signals at north bound and south bound on and off ramps will remain on 'flash' for the duration of the closure. Due to the reduced lanes, motorists are advised to seek alternate routes and expect delays if/when traveling through the construction area.

Stay connected with Caltrans and traffic conditions with our QuickMap tool at <http://quickmap.dot.ca.gov/> and follow us on Twitter @Caltrans8 and like us on Facebook.
